THE CONNECTICUT CAMPUS

CONNECTICUT DAY, MAY 10th, BIG TIME FOR ALL

VOL. VII

STORRS CONNECTICUT, WEDNESDAY MAY 4, 1921

NO. 25

"BUT SPARE THAT LITTLE PORKER" HE SAID

"NO PIG RACE" SAYS AGENT

Suggests Good Lively Freshman as a Substitute—Cannon Race May Take Place

Surely the majority of the population of Storrs must have allowed at least one sigh to escape in sympathy with the Freshmen who had their mouths all tuned for the taste of roast pork, or their mighty Sophomores, who were sure that they were the ones elected by Fate to taste of pig, when it was announced that an agent of the State Humane Society had found his way into the wilds of Mansfield and decreed that Mister Pig should be neither greased, chased nor fought for on Connecticut Day or any other day of the College Calendar.

Sighs or no sighs, the fact remains that no one will be able to laugh at some one hundred and fifty fellows as they go dashing, diving running and sliding after a slippery and squealy Porker, and that the opposing classes of the College will look to the Seniors to scratch their well filled(?) heads for another means whereby a contest can be staged that will be fitting to determine whether Frosh or Sophs be mightier.

When asked for his reason for prohibiting the contest, the agent explained that it was against the principals of the Humane Society and suggested that a good lively Freshman be substituted.

In all probability the custom adopted in many other Colleges, namely a cane or cannon rush, will be the deciding conflict that is scheduled for Tuesday, May 10, Connecticut Day.

Final Nutmeg Installment Now Due. Look up your solicitor. Book will be out Junior Week

A NEW HONORARY FRATERNITY

At the recent M. I. T. Convention in Boston, inquiries were made in regard to the national journalistic fraternity, Phi Delta Epsilon. This fraternity has a relation to Publications similar to that which Theta Alpha Phi has to Dramatics. Negotiations have been already started toward the installation of a chapter at Connecticut.

CONNECTICUT DAY "PEP" ALREADY BEING GENERATED

BIG DAY COMES MAY 10

Gardner Dow Field to Receive Much Attention. Dance in Evening

Connecticut Day will be held on Tuesday, May 10, this year, according to the plans of the Connecticut Day Committee adopted at a recent meeting of the faculty members on the committee, consisting of Mr. A. S. Fraser, Chairman and Messrs. Guyer, Moss, Hollister, Manchester and Wheeler.

All classes will be suspended on that day and every one is expected to turn out and help put the Gardner Dow Field and campus grounds in first class condition.

Those who were on the Hill last year for Connecticut Day will remember how the faculty appeared in old clothes and worked with the students on construction and clean up work.

Trees were pruned, brush back of the dormitories and the new dining hall was cut and burned and the roads and grounds were put in good condition for the Junior Week festivities.

A vast amount of work was accomplished, and the campus looked like a different place at the end of clean-up day. By four o'clock the work which had been mapped out by last year's committee was finished, and many were the tired backs and blistered hands.

But everybody was happy and fully ready to do justice to the bountiful out-door supper served under the direction of Miss V. Z. Taft and Mr. A. G. Skinner.

This year one of the projects to be undertaken on Connecticut Day is the grading and general improvement of the Gardner Dow Athletic Field, and several committees have been appointed to take charge of the various details of the work. At present these committees contain only faculty members but at a joint meeting of the Connecticut Day Committee and the Student Council to be held on May 5, one student member will also be appointed to serve on each of these committees.

The faculty members and their respective committees as appointed at the last meeting are: Grades, Prof. C. A. Wheeler; Tools, Prof. S. P. Hollister and Mr. G. W. Fraser; Teams, Prof. H. S. Garrigus and Frank P. Miller; Grading, Prof. R. E. Dodge and Prof. A. T. Stevens; Drains, Prof. A. W. Manchester and B. W. Ellis; Refreshments, Dr. E. W. Sinnott and Mr. A. G. Skinner.

(Cont. on apeg 3 col. 3)

SUPT. OF BUILDINGS TO ENTER CONTRACTING FIELD

GEO. A. BLAKE RESIGNS

Place to be Filled by L. B. Tenney, Formerly in Charge of N. Y. State Reformatory

George A. Blake, superintendent of buildings, has handed in his resignation to take effect immediately. His place will be taken by L. B. Tenney, who has spent many years as superintendent of buildings at the New York State Reformatories at Elmira, and Napanock, N. Y.

Mr. Blake came to Connecticut Agricultural College from Hamilton New Jersey where he had previously been in business as a private contractor in October, 1911. For four years he held the position of instructor in woodworking and mechanical drawing. Since 1916 he has devoted his full time to the manifold and exacting duties which his position has incurred. The year Mr. Blake has spent as superintendent of buildings have witnessed many changes and additions in the college property and incidentally to the duties of his department. Koons Hall, Hawley Armory, Central Heating Plant, Water tower, Infirmary, New Dining Hall, New Dairy Barn, and many cottages for the housing of the faculty have all been constructed during his regime while Gould Hall, Grove Cottage, Chemistry Laboratory and the old dairy barn have all disappeared from the campus due to the ravages of fire. The Administration Building has been altered and realtered under the supervision of Mr. Blake so that now every nook and corner has been brought into use either as an office or laboratory. Another big step in development with associated is the water supply. The deep well pump in the rear of the Administration Building which supplied the community at the time of his arrival was soon forced to give way to one of much larger capacity and this in turn was soon supplemented by a temporary reservoir near Tower Hill. At present a water system costing over \$130,000 to install is necessary to supply the demand.

Working under all sorts of handicaps and inconveniences, Mr. Blake has very successfully handled his department and his ability to cope with the many difficulties which his department has faced has in no small measure contributed to the holding of every inch of ground gained in the advancement of the institution physically. Mr. Blake will move to Hope-Well, New Jersey where he is to enter the contracting business again.

MACMILLAN GIVES NEW IDEA OF FROZEN NORTH

WITH PEARY AT POLE

Shows Pictures of Flowers that Grew Twelve Degrees from Pole

A very interesting lecture of his experiences in the far North, along with moving pictures and lantern slides, was given by Donald MacMillan in Hawley Armory Saturday evening. Mr. MacMillan has made several expeditions to the Arctic Region, accompanying Robert Peary on one trip. He spent four years in the land of snow and ice on one of the trips. His moving pictures and slides depicted life and conditions in the far North and created a strong impression on his audience. Many people consider the Arctic Region as a land of ice and snow but the lecturer gave a very different idea. He showed pictures of flourishing patches of flowers taken 12 degrees from the North Pole.

Another interesting feature was the pictures of the wild animals and how they exist. Many pictures were shown of the natives. They always seemed happy and invariably had the white man's pipe in his mouth.

MacMillan has already fitted out another expedition and expects to set sail in July. His main purpose this trip is to explore new lands and make some discoveries new to science. Some of the Aggie students, very much impressed by the lecturer's description of the Northern regions, are seriously considering making application for passage on the next journey.

NUTMEG WELL UNDER WAY

The Editor and Business Manager of the 1921 Nutmeg visited New Haven Friday and Saturday of last week to help the printer make ready for the last pages of the book, which is already printed through to the Sophomore section. This means that the Administration, Faculty, Campus Views and Junior sections are finished. Whether the recent printer's strike will greatly affect the Nutmeg is not definitely known. If the S. Z. Field Co., which is printing the book, is not materially hampered by the union walk-out, the yearbook will be ready for distribution Junior Week.

AMORY CUP COMPETITION TO COME MAY 20 COMPETITION TO BE KEEN

**Much Rivalry Among Three
Units. Capt. Poole Offers
Smoker if Winner**

The annual competitive drill for the Amory Cup in the R. O. T. C. Battalion will be held on Friday morning May 20 from ten to twelve o'clock. There is always keen competition between companies for this cup, since the winning company in the battalion has its name inscribed on the cup, with the year in which the cup was won. Since the drill comes on the morning of the Junior Prom, it is expected that a large number of visitors will be on the Hill to witness the competition.

Members of the R. O. T. C. unit are excused from classes between ten and eleven, and that hour with the regular drill period from 11 to 12, will be devoted to the event.

The battalion will form at ten o'clock in front of Hawley Armory and after a battalion drill, each company will have a certain length of time in which to carry out the following drill program: manual of arms; marching in company front; halting for an exhibition of unison and proficiency in the manual; close order drill and extended order drill.

Each company will also be scored on the following points: calling the roll; inspection of rifles and uniforms; soldierly bearing; and officers' knowledge of drill and commands.

The competition will be judged by three officers or ex-service men and the cup will be awarded to the winning company at the close of the drill.

There are three companies in the battalion, Company A being captained by Earle D. Blevins; Company B by William H. Pool, and Company C by J. Peter Johnson, all members of the senior class.

Last year the cup was won by Company C, under the command of Captain Maurice H. Lockwood, now Battalion Major of the unit.

Following the competition last year Company C was given a smoker by Captain Lockwood, and Captain Pool has offered to do the same this year if Company B wins the Amory Cup.

Looks like the boys have finally got a stranglehold on Old Man Confidence.

Seems as if the boys could make just a little more noise in the field when it looks good.

RAIN SPOILS CHANCE OF VICTORY OVER MASS. AGGIES IN FAST GAME

**TEAM WORK LIKE A TOP UNTIL GAME IS CALLED.—
THREE MEN PER INNING "ALEX'S" SCHEDULE.**

The Aggie nine started in like teams of old in their first tilt with Mass Aggies on Gardner Dow Field last Friday afternoon. The Aggies started with the old favorite battery of Alexander and Metelli and it worked to perfection while it had the chance to show their goods.

With Captain Metelli on the receiving end, the team took a new lease of life and showed all kinds of pep and confidence necessary in any game.

The Aggies took the field and 'Alex' cut down the first three men to face him in short order. In our half of the first, Emigh was able to reach first on a free ticket but Alexander's long drive was easily hauled in by Mass Aggie left fielder after a sprint for the distant garden.

In the second inning the Massachusetts men were retired in one, two, three order. Minacci drove the first ball pitched to right field, where Gordon dropped it leaving Minacci safe on first. He was able to reach second on Kroeck's wild heave to first. Then Baxter laid down a pretty sacrifice that sent Minacci to third, where he lost his chance of scoring when Brundage drove a low hot drive in Lent's hands at short stop.

In the third inning neither team was able to hit or to put a man on bases.

FACULTY HAND SOPHS ANOTHER JOLT

On Monday, April 25, the Faculty met the Sophomores in a hard-fought battle on the Gardner Dow Field. The result of the game was a victory for the first mentioned party, though it required hard work to win.

Prof. White, on the mound for the Faculty, delivered a good brand of ball, while "Connie" Mahoney held 'em all behind the bat, besides holding down the base stealing record of the opponents. The Sophomore battery Dickens and Patterson, did well after they got warmed up.

The first run came in the initial inning when the Faculty brought one man across the plate. The score remained 1-0 until the third inning, when the Faculty managed to bring in one more man. Still the Sophs had nothing but a goose egg to their credit, when, in the fifth inning, the Faculty started again and brought in three more runs. In the next inning, White was replaced on the mound by Moore, who held them down well until the seventh. In the last of this inning the Sophomores hit Moore

In the fourth inning Alexander drove out a pretty three bagger into the tennis courts in left field, but was unable to reach home.

A fair idea of the kind of playing can be obtained by looking at the table which shows that till the game was called by the umpire only three men faced Alexander each inning.

Conn.	ab	bh	po	a	e
Gordon ss	3	0	0	1	0
Metelli c (Capt.)	2	0	1	0	0
Emigh cf	2	1	1	0	0
Alexander p	2	1	1	3	0
Minacci 2b	2	0	1	0	0
Baxter 1b	2	1	3	0	0
Lord lf	2	0	0	0	0
Brundage rf	2	0	0	0	0
Brow 3b	2	0	1	0	0

Gordon rf	1	0	0	0	1
Kroeck p	1	0	0	0	0
Marshman 1b	1	0	0	0	0
Harrington 2b	1	0	0	0	0
Connecticut	0	0	0	0	0
Massachusetts	0	0	0	0	0

Two base hit, Alexander; sacrifice hits, Baxter; Struck out by Alexander 4, Kroeck 2; Wild pitch, Kroeck; Time 40 min; Umpire, Morin.

hard, bringing in four runs in a bunch. With the score 5-4 in the last half of the last inning, it looked as if the game would be tied when the Sophs barely missed bringing their last man home. As fate decreed however, he was out on home, finishing the inning and the game with a score of 5-4 in the Faculty's favor.

The line-up was as follows:

Faculty		Sophomores
White, Moore	p	Dickens
Mahoney	c	Patterson
Bauer	1st	Daly
Brundage	2d	Steere
Brown	3d	Feldman
Schwartz	ss	Cohen
Moore	lf	Kenneth

Captain "Socco" Metelli sure put the old punch in the team on his initial appearance Friday.

Ellis Munroe, Extension Specialist in Marketing, has undergone a major operation in the Presbyterian Hospital in New York. He is now reported to be recovering rapidly.

PROF. KNIPE LECTURES TO AGRICULTURAL CLUB

Boas Elected President of Organization

The weekly program of the Agricultural Club was continued last Thursday evening, when Prof. F. W. Knipe, of the Agricultural Engineering Department spoke on some of the phases of his particular work. He brought out the fact that formerly Engineering and Agriculture were separate lines of activity but that present day conditions have made it imperative that the two work together. He stated that the field of Agricultural Engineering is very broad, requiring a wide knowledge, and including Farm Structures, Drainage, Irrigation and Farm Power. In America today there are at least eighty million acres of land to be drained, nearly two hundred acres that should be cleared of stones and stumps, while probably one hundred and fifty acres need to be irrigated. In the field of Farm Power, it is evident that the horse will never wholly replace the tractor on the farm.

The field of Journalism in connection with Agricultural Engineering opens up a big field, as many people are not familiar with modern machinery, and the papers must serve the people as an educational organ. At any event the opportunity in these fields exceeds the supply in all branches.

At the close of the lecture the following officers were elected for the coming year for the Club: President, H. D. Boas; Vice-President, F. V. Williams; Secretary and Treasurer, E. J. Smith; Sergeant-at-Arms, W. D. Burrington; Chairman Program Committee, R. C. Abbe; Chairman Finance Committee, Raymond Heath.

FRESHMAN ELECTIONS

At a recent meeting of the Freshman class it was decided that inasmuch as there would be no banquet it was desirable to elect a president at once. Waldo P. Brown was awarded the office. Officers of the Freshman class are: President, Waldo Brown; Vice-President, Hilfred Nelson; Secretary, Hazel Palmer; Treasurer, Fred Peterson.

It will give the Springfield boys a surprise when the team lines up with that do or die spirit sticking out all over them.

"Phil" Lord is spearing them out of the river just as easily as in deep left. We mean fish in the river.

JUNIOR WEEK PLANS

PRACTICALLY COMPLETE

Further plans for Junior Week were discussed at a meeting of the Junior Class on Monday evening, May 2. H. R. Webb reported that the Nutmeg was progressing favorably and the Junior Week committee reported on the banquet, canes, play and Prom.

A tea-dance will be given by the Junior co-eds in the Armory on Saturday afternoon from four to six, and everyone is invited. The same orchestra which is to play for the dancing after the Junior Play Saturday evening will probably play at the tea-dance. This practically fills up the schedule of events for the week end and the programs for Junior Week will be out in a few days.

"BILLETED" CAST NOW

REHEARSING FOR EVENT

Cast to be Coached by M. J. Farrell. Success Predicted

On Saturday evening, May 21, of Junior Week, the Junior Class will present their annual play in Hawley Armory. The committee in charge have selected the play "Billeted," a production in three acts written by F. Tennison Jesse and H. M. Harwood. The class has been very fortunate in securing the services of Michael J. Farrell as coach for the play. Mr. Farrell has coached several plays on the Hill and each has been attended with great success as was recently shown by the play which was given after the "Informal."

No expense has been spared by the committee in obtaining special scenery and stage effects for the production which dramatic critics predict will be one of the most successful ever given on the Hill.

The well chosen cast for the play is:

Peter Taradine, alias Capt. Rynill	Philip Dean
Col. Preedy	Franklin Hawley
Rev. Ambrose Liptrot	Arthur Frosthalm
Mr. Macfarland	Theodore Gardner
Betty Taradine	Viola Ericson
Penelope Moon	Louise Ransome
Miss Liptrot	Mildred Gay
Mrs. Brace	Mary Beegley
Rose	Gladys Goldthorpe

(Cont. from page 1 col. 2)

Trees, Mr. A. E. Moss; Tennis Courts, Professors W. F. Kirkpatrick and G. C. White and B. A. Brown; Back Stops, Prof. J. H. Fitts and H. A. Dressner; Signs, B. A. Brown.

A great deal of improvement can be made in the condition of the athletic field and it is planned to lay a drain at the west end of the field in order to carry off the water which collects after every rain. A definite line is to be established along the north side of the field and the ground graded as far as this line. The east side of the field in front of Hawley Armory will also be graded and a wire mesh back stop is to be substituted for the present wooden one. The tennis courts will be leveled and rolled and the signs on the roads leading to the College will be repaired where necessary.

It has also been suggested that the bleachers on the north side of the athletic field be repaired and an addition built at one end in order to better accommodate the crowd during the home games.

Everyone will have something to do and there will be plenty of work for all. Supper will probably be served outdoors again this year and a dance may be held in the Armory in the evening as was the case last year. With the cooperation of students and faculty a great deal can be accomplished in the way of permanent improvement and the student body is looking forward to the big day and to the fun which accompanies it.

AT OTHER COLLEGES

The students of Springfield's Young Men's Christian Association College are endeavoring to have the trustees of the institution change the name to Springfield College.

The University of Vermont has taken out insurance against financial loss for its baseball team because of wet grounds.

There is a possibility that Cornell, Dartmouth, Columbia and Pennsylvania may combine to form a "big four" destined to rival the "big three" Yale, Harvard and Princeton in the intercollegiate world.

Trinity's alumni have taken it upon their shoulders to raise \$1,500,000 as a gift to their alma mater on her one hundredth anniversary.

Rhode Island State is planning a Junior Week, the first of its kind at the institution. It will continue from May 12 to May 15 inclusive.

The following ten colleges will each receive \$50,000 from the estate of the late Edmund C. Converse of New York: Trinity, Amherst, Bowdoin, Dartmouth, Leland Stanford Jr., Oberlin, Smith, Tuskegee, Wells and Williams. The funds are to be used for the establishment of scholarships.

Amherst's faculty has declared twenty-five of her varsity baseball players ineligible. The coaches are having a strenuous time piecing together a new team.

The price of board at the College of Idaho has been lowered from \$4.25 per week to \$3.75.

The male students of Cornell are taking their stand against co-education. They recommend permanent restriction on the number of women students and complete segregation as the ultimate end.

Dr. Thomas formally ended thirteen years of service at Middlebury College last Wednesday. Dr. Collins is now acting president.

SOPHOMORE FRESHMAN

TEA PARTY MAY 13

To Bury the Hatchet and All Grievances

In Hawley Armory, Friday evening, May 13, the ever and ancient rivals, members of the classes of '23 and '24 will mingle together in friendly companionship when the annual party given by the Sophomores to the Freshmen will take place.

Dancing will be the feature of the evening but the card wizards will have ample opportunity to enjoy their favorite pastime and several new and unique features will be uncorked. Refreshments and lots of them, according to Allan Bates, chairman of the committee will be served. The Sophomore class is attempting to make the evening one long to be remembered by every freshman present.

Dr. H. K. Denlinger is attending a three-day conference at Atlantic City this week, in connection with this summer's Chautauqua work, in which he will give a series of lectures on his interpretation of America.

THE PROFESSOR HIMSELF

A professor is a strange sort of human being and there are some professors that are stranger than others. Is not the professor classed with the dodo bird, short skirts and William J. Bryan, as the butt of all the twentieth century jokes and caricatures? The reason for this average conception of professors is no doubt a judgment brought about by their actions in the class room, which it must be admitted are oftentimes strange, and because we are most of us deprived of the pleasure of sharing the professor with himself when he is in a normal frame of mind. The inability to meet the professor on common ground outside of the class room is one of the tragedies of college life, though only those who have known professors more informally and less mechanically than in the class room will feel the truth of this statement.

It is to be regretted that the opportunities for students to fraternize with professors in the same manner as they fraternize with their elder men friends are few and far between. Most students probably do not believe that there are many instances where two or three students and as many professors associate in a purely informal manner, smoke cigarettes from the same package, and converse with boyish enthusiasm on various subjects which are of interest to both. There aren't as many instances as there should be, 'tis true.

Some of the professors at Connecticut have taken pains in their classes to show that they have a different side to their natures than is expressed day in and day out after the roll is called, whereas others don't. It is safe to say that the former are more respected and longer remembered by the students than the latter. Other professors go even further and take pains to become acquainted with the students in their classes, with their ambitions, ideas and hopes, making an endeavor to encourage the students

according to their worth and ability, and to put them in contact with material that will aid them in their work. These professors, whom by the way are not so numerous, are the ones who make an average course a gold mine. It is oftentimes better for students to pick professors than courses.

Some of the professors on this hill have often shown a desire for a more thorough acquaintanceship between the faculty and the students and various methods, such as huge get-togethers and social affairs have been suggested. President's hour was originated with that idea and although it is now perhaps the most interesting hour in the program of the week's activities because of the very influential and in formed speakers who have been presented, it has failed in better student acquaintanceship with the professors. And so will any similar scheme of association fail to make any valuable return, because it is too big, and formal, and lacks intimacy. When the professors and students can meet with the same degree of companionship and freedom as the boys do in the corners of the fraternity rooms then the full values of such an acquaintanceship will be brought forth.

Such association is probably as valuable in the formation of higher thinking individuals as the work of the class room. Only those who have experienced such a companionship can fully realize its values. Therefore, let us hope, that as the years pass on every student will at least know a few professors in some other way than a class lecturer, and that every professor will know a few students in a different way than they appear in class. The intercourse would be of untold value to each in making the world a better place to live in and live for.

Perhaps a large amount of the initiative needed to make this a reality must be demonstrated by the professors, for they must show a desire to welcome the advance of the student, and perhaps if a student they happen to be interested in is backward, reach out and make him welcome. This is just a hint. The writer, a senior, looks back with keen enjoyment and with a feeling of satisfaction to the chats and conversations, not devoid of argument, which he has had with some of the professors, and wishes that students who follow him could have better opportunities to see the human side of the professors and learn the value of the professor as a man, when he is in company with the other boys, where the cigarettes glow cordially and where any subject from metaphysics to baseball is discussed enthusiastically.

TRACK AND COACH DALY

The enthusiasm which is being shown toward track athletics at Connecticut is quite remarkable and the interest promised by the student promoters of the sport when the project

was first presented for consideration is an actuality. Much of the success is no doubt due to the good fortune of being able to obtain Mr. Daly for coach. Coach Daly comes to us a veteran track coach and is putting in time and energy which should bring favorable results. He is untiring in the personal attention which he gives his men, and has absolute faith that his men will be able to hold their heads up without difficulty in the meets with Rhode Island and Trinity. The spirit shown by the track men is one of the better things of the collegiate year.

CONNECTICUT DAY

Tuesday, May 10, has been officially designated Connecticut Day for 1921. Now Connecticut Day is not merely another name for clean-up day. It means just what you want it to mean. It is clean-up day for you if you look at it as something to be "ducked" and to be ridiculed as labor decoy. But there are few, very few, who feel this way about it, although ever so often somebody is likely to pass the word around that something is being "slipped over on them." But most of us see in Connecticut Day a real live generator for Aggie spirit in which this spirit is easily turned into actual results. You work next to Prof So-and-so digging a ditch on Gardner Dow Field and soon discover that he isn't out to kill the spirit of the Aggie student via the Secretary's office but is perhaps even a little more enthusiastic than you are. Soon you find out just why he marked you the way he did and perhaps you may see where you yourself slipped a little. Of course, it usually isn't your fault though, this is a rare instance. You see some lame duck over in the other crew "stalling" or killing time and automatically he drops ten points or so in your esteem. Pretty soon somebody asks where Jack is and you hear he is down in "Willi" or over in the dorm. If his stock doesn't hit zero then he must be a wonder. Keep this in mind and see if it isn't true.

All kinds of enthusiasm, "pep" and even blisters were in evidence last Connecticut Day and the student body was in the happiest frame of mind imaginable. This will be duplicated this year too. All that is necessary is your individual cooperation and best holiday grin.

Dear Editor:

A few words with poor abused "Disgusted" in regard to his enlightening epistle of two weeks ago. "To struggle through an evening with our congenial co-eds" is the matter of fact way he quietly hands the girls an unfair dig. Now he probably realizes after last week's reply that there are two sides to every story. If he ponders at all on the article in last week's "Safety Valve" he must have come to the conclusion by now that there are fully as many and probably

SAFETY VALVE

Dear Editor:

I have noticed with some amusement the recent Safety Valve articles of "Disgusted" and "Fellow Sufferers." One maintains that he is obliged to "struggle through dances with the co-eds" and the other side maintains that the men chose their partners and that the co-eds are not given a fair chance. It seems to "a sometimes observer" that this difficulty is about six of one and half a dozen of the other. If a fellow picks his partners, he should have no kick coming, and if he goes to a dance alone and gets two or three dances or cut ins, it is his good luck and the "fair co-eds" hard luck in a good many cases. The co-eds say they have little choice in the matter of partners and this is often true, so that they may be pardoned if they too find it necessary to struggle through some of the dances.

But ye both the co-eds and the men must practice on someone, and why not have a good time on the Hill, instead of being a "Willi" hound? Do the good dancers go to "Willi" because there is no attraction on the Hill, or because distance lends enchantment to the view? There are plenty of girls who would like to dance on a Saturday night if they had an escort, but what girl likes to go to the Armory alone every week and wait for someone to "favor" her with a dance?

And there are plenty of fellows who go to a Saturday night dance and stand around without a partner, and go away disgusted because they can get no dances. Why not use a little co-operation and give some co-ed a chance to "practice" as you call it, while you yourself are struggling through the evening. Practice makes perfect and at the same time you can become better acquainted with the members of the opposite sex on the Hill. Let's see a little less knocking and a little more boosting. Get a partner for the next dance and don't be a "Willi" hound or a stay at home!

more good dancers among the girls than there are among the fellows. May I permitted to remark, however, that perhaps "congenial co-eds" may have just a little justification. Now there is nothing radically wrong with the girls. In fact they will tell you that themselves and besides we "wheats" have no cause to complain. Don't they even smile at us periodically, thus upsetting us for days to come? No, boy, it's all your own fault. If you want to make a complaint about any boisterous co-ed who insists on recognizing you on the campus, don't use the Storrs Hall lawn for it but makes a firm appeal to the W. S. G. A. They will protect you and see that offending member is promptly assigned one extra "gym" period as punishment.

Yours congenially,
Not Disgusted.

KAMPUS KLIPS

Dear Phiz: Is strychnine effective in stopping heart ailments?—Co-ed.

Yes, if taken in sufficient quantities, strychnine will stop anything.

Mr. Daly of the Bookstore, nephew of Coach Daly, has a new book for sale at his establishment. It is entitled, "Feeds and Feeding," by Timothy Hay.

Mitchell, while dreaming in History class the other day, evolved a new system of dancing as an improvement over his ordinary style. "It has a lot of revolving in it," said Mitch, "so I called it the French Revolution."

Steve, calling Boston:

"Hello, how's everything?"

"———"

"That's good. Have you anything to say?"

"———"

"Do you—a—ah—as much as ever?"

"———"

"No more?"

"———"

"Oh, twice as much! That's fine. Are you sure?"

"———"

"Good! Well, good night ——! See you at the Prom."

A FRESHMAN SAMPLE

Dear Pa:

You know, Pop, I've been hitting the books pretty hard lately. Yes, indeed. Why only the other day a professor told me there was no need of my going to class. He said "You can't learn anything" and before he had a chance to say "more" I broke in and said "I suppose not, professor, but I'll stay around and help you out." Well, he kind of choked with gratitude but couldn't say much just then. Oh say, Pop, you know Junior Week will be here pretty soon and I've been asked to attend the Prom. Usually the fellow does the asking but I guess there must have been some competition among the girls for me because this girl wouldn't take no for an answer. I suppose I'll have to go now. About fifty dollars will be enough. Don't think I'm wasting this Pop, because you know I'm careful and conservative. I guess us freshmen are going to get off pretty easy this year. I told a Soph to go chase himself the other day. Lucky for him he didn't hear me.

Fiftily yours, Peter.

Scene I. at Irving House

Wallace entering Graf's (?) room in hotel: "Time to get up Beano."

Female voice under the covers: "Sir, how dare you!!"

Hasty retreat.

Scene II.

Diddle: "Did you wake him up?"

Wallace: "No, he was sleeping so sound I hated to wake him!"

Diddle: "I'll wake him up all right!"

And he did!

FEED UP!

EVERY dairyman knows that he must feed proportionately for the light summer period, as well as in the heavy winter months, if he wants a large flow of milk from his herd when he can sell it at a good price.

Here is the way it works out:

Suppose your price for milk is \$1.90—with an almost certain prospect of being lower when grass comes, and pastures are good.

Now, if you feed a Buffalo Corn Gluten Feed mixture at a cost of about \$30.00, you can produce at least \$130.00 worth of milk from your good milkers.

If your milk price goes down—say to \$1.20—you can still get \$84.00 from the same cows and the same amount of feed.

It has been proven that if you do not feed in the summer your cows will shrink after the first flush of grass. You will not only lose the profit you might have had from them by proper feeding, but, on account of their poorer condition, your herd will not produce as much milk when you start heavy feeding again.

These are facts that should make every dairyman consider seriously his feeding problem, on a basis of cost and return, during the grass months now coming in. And then order Buffalo Corn Gluten Feed for your herd.

LIVESTOCK MEN TAKE TWO-DAY JUDGING TRIP

**Flintstone Farm, Brookvale
Farm and Mass Aggie
Visited**

Tuesday night a tired but happy group of Animal Husbandry students returned to Storrs after a two-day judging and inspection trip through the Berkshire Hills of Massachusetts. The weather was perfect, the roads in fine condition and some of the best show herds in Massachusetts were visited on the trip. Fifteen seniors and juniors made the journey, and were accompanied by Prof. H. L. Garrigus and Mr. A. G. Skinner of the Animal Husbandry Department, and by Mr. J. A. Simms of the Extension Department.

The party left the College Monday morning for a hundred mile drive to Flintstone Farm, Dalton, Mass. The route lay through Springfield, Westfield, Woronoco, Huntington, up amid the beautiful scenery of the Berkshire Hills, over the trail called Jacob's Ladder, and past the numerous summer mansions in Lee and Lenox. At Lenox the party stopped for a picnic lunch provided by the dining hall, and then continued its journey through Pittsfield and Dalton, reaching Flintstone Farm about one-thirty in the afternoon.

Here the group were met by E. S. Crane, the owner of Flintstone Farm, and by Lee Boyce, the farm manager. The farm, or group of farms, contains 3500 acres, of which 800 are under cultivation, and maintains a herd of over one hundred milking Shorthorn cattle, besides a herd of Berkshire hogs and about twenty Belgian horses.

At the Eastern States Exposition last fall, Flintstone Farm Milking Shorthorns won in every class in which they were shown, and Mr. Crane also had some good show stock in his horses and hogs. Several classes of cattle and hogs were judged by the students and the barns and equipment were inspected during the afternoon.

Supper and rooms were secured at the Irving House in Dalton, after which most of the party boarded a car for the "white lights" of Pittsfield and a show or two. The next morning it took two men to awaken some members of the party, but by eight o'clock every one was at Flintstone Farm, where the Belgian horses were inspected before the party journeyed to Marshall Crane's Brookvale Farm at Windsor, Mass.

Here the manager, Sam Morrison, exhibited a very uniform bunch of Herefords numbering fifty pure-breds in the show herd and about one hundred heifers and steers which were being fattened for beef. More judging classes were held here and Northampton was reached in time for dinner. After dinner the "livestock experts" indulged in judging the "passing show" before going on to their next stop at the Massachusetts Agricultural College. Only a brief stop was made here, but the students looked through the dairy and horse barns,

PROF. WHITE ADDRESSES AGRICULTURAL CLUB

Explains Laws which aid Farmers and Speaks of Problems of the Dairyman.

Professor G. C. White gave an address before the Agricultural Club Thursday evening, April 21, that was full of inspiration as well as education. He first outlined the advantages of such an organization as the Agricultural Club, for gaining experience in constructive work in agriculture. Part of our education in this line should consist in a knowledge of the Governmental Acts in reference to Agriculture that have helped materially in the molding and perfecting of the organization that is prevalent today. These acts started with the Morrill Act in 1862, or during the Civil War period. This act made possible the establishing of the Land Grant colleges. The second Morrill Act in 1890 gave more funds for the teaching of Agriculture and also of Mechanic Arts.

In 1887, the establishment of the Hatch Act, gave funds for the building up of our systems of Experiment Stations in connection with the colleges.

In 1906, the Adams Act made possible the founding of research work, or the extension of the Hatch Act to make it possible for the needed research work to be carried on.

The Smith-Lever Bill of 1914 established the efficient system of Extension work, carried on in nearly every county of the country through the medium of the Farm Bureau. A final touch was added in 1917, when an act endorsing Vocational Training in Agriculture and Industrial trades.

From the dairyman's standpoint, the problems at the present time are mainly those of marketing. There are also problems of efficient advertising, which should be emphasized a great deal more by the dairy farmer. The campaign for pure bred stock and the maintenance of these herds by sufficient tuberculosis control measures. From the political side, the discussion of tariff and its effects upon the dairy industry have a place in the consideration of the problems of the dairyman and indirectly of the consuming public.

A very interesting motion picture program was shown in the Armory Wednesday evening April 27, under the auspices of the social committee. Several films covering subjects related to agriculture were shown.

and saw the "trick army" and cavalry unit form before starting on their homeward journey.

Very few of the fair sex were in evidence as the cars sped past Mt. Holyoke College, and the remainder of the trip to Storrs was quite uneventful. Five o'clock saw the party safely back at the College and every one voted the trip to be a most enjoyable one.

RABBI WISE ADDRESSES COLLEGE ASSEMBLY

"Problem of Americanization"
His Topic. "America is Suffering a Moral Relapse," he says.

Last Wednesday the faculty, students and residents of the community were given a real treat in the realm of oratory and public address when Rabbi Stephen S. Wise of New York spoke at College Assembly. Rabbi Wise is the founder and the present head of the Free Jewish Synagogue in New York, and he has achieved a national reputation for himself as an orator and a man with a message for his audience. During the War he was on the U. S. Council of Defense, and was connected with several other national organizations. In 1918, after twenty years of preaching, he went to work in the shipyards for a short time, in order to help in our war-time production.

As a speaker, Dr. Wise's humor and irony kept his audience on the alert, and his message is of vital interest to every American today.

His topic was "Our Problem of Americanization," and he said in part:

"On Armistice Day, 1918, we, the American people, had become, as never before, a united people. The old hyphenisms had disappeared, as we hoped never to return, but now they have forced themselves back upon us again. During the War, America seemed to have purged herself, but now there is danger of her suffering a moral relapse, and America seems to demand a moral vacation as a result of war strain.

"We have already suffered a lowering of our spiritual strength, but we do not deserve a moral vacation, for we have not sacrificed as Europe has sacrificed and we did not win the War. All America did was to throw her political, moral and physical influence into the scales at the critical moment, but this was needed in order to win the War. Great Britain and France lost hundreds of thousands of men in the War, and sixty percent of the Armenians have been killed or massacred, while of the Americans, only one-twentieth of one percent were killed.

"The problem of Americanization is with us today. Immigration is a purely physical process, while Americanization is a spiritual and mental process, which has no relation to blood or racial stock. The ability to become an American depends on worth, not birth, and upon personal achievement, not on ancestry. A man can be a good American without 300 years of ancestry back of him, although some people do not seem to think so. Yet you cannot make a man of foreign birth like yourself, for with uniformity there is no unity. The glory of America lies in every man being his own self. A man cannot give up his personality or his religion, but he can yet be loyal to the American nation as was proved in the Great War. Let America be your religion,

ANOTHER WIRELESS OUTFIT APPEARS AT C. A. C.

Prof. Knipe to Secure Latest Market Reports by New System

During the past week a wireless receiving station has been installed on the top floor of the Dairy Building by Professor F. W. Knipe of the Agricultural Engineering Department. Mr. Knipe with the assistance of Mr. H. A. Dressner of the Mechanical Engineering Department has an outfit which is composed of all the latest receiving appliances, including the tickler coil and Audion detector. The equipment is almost identical with that of the set owned by Mr. Dressner but will have a larger receiving radius owing to the longer spread and height of a four wire aerial which occupies the entire length of the roof on the Dairy Building. There are now three wireless receiving sets on the Hill, the other being located at the Poultry Plant and operated by one of the employees.

Mr. Knipe was at one time a commercial wireless operator and is perfectly familiar with all the branches of the science. According to Mr. Knipe his chief purpose in erecting the set was to obtain the market and news despatches which are sent out by the large dailies every evening, thus obtaining important news items about twelve hours ahead of the time when they would reach Storrs by mail. In the near future Mr. Knipe also intends to establish a powerful sending outfit with which he hopes to be able to communicate with operator friends of his at Arlington and other large commercial stations.

GRANGE NOTES

On Monday, April 25, the Mansfield Grange held a special meeting in the church parlors. Features of the evening were the working of the first and second degrees on ten candidates and the enjoyable program given by the stenographers.

The program consisted, in part, of some funny pantomime work by the "stenogs" which brought roars of mirth from the audience. Another number consisted of vocal solos given by Bertram Smith.

Those receiving the first and second degrees were: Mrs. Weeks, and Messrs. Weeks, F. W. Wooding, A. H. Crofts, J. J. Clark, L. W. Kenneth, R. A. Phalen, H. E. Bolan, W. Brown and Matern.

The third and fourth degrees are to be given the candidates at the next meeting on May 9.

and give your all for America."

Dr. Wise also made a strong plea for Christian Armenia and Jewish Palestine, which Wilson declared should never be returned to the Turkish rule. He stated that we had deserted Armenia because of political differences within the Senate and declared that we should back up our President at all times, irrespective of creeds or political parties.

FOUR YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B. S. degree.

TWO-YEAR COURSE in the School of Agriculture, for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who have completed the work of the common school.

FOUR YEAR COURSE in Mechanical Engineering. Four years of high school work required for entrance. B. S. degree.

FOUR-YEAR COURSE in Home Economics. Open to young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture.

Recent appropriations have provided additions to lands, buildings and equipment valued at \$950,000. Expenses low. No tuition charge to residents of Connecticut. Military instructor. A catalog will be sent upon request.

CHARLES LEWIS BEACH, President.

ICE CREAM MEN MAKE TWO DAY INSPECTION TRIP

At five-thirty Friday morning, April 22, seven members of the class studying the making of ice cream left the Hill under the leadership of Prof. R. C. Fisher to visit the important commercial ice cream plants of New England.

Five establishments were visited by the students making the trip. In each factory the entire plant was observed with the manager acting as a guide to explain the workings of the establishment. On Friday the factories of the Tait Bros. in Springfield, Mass., the New Haven Dairy in Hartford and the Semons Company in New Haven were visited. After spending the night in New Haven, on Saturday morning the plants of the New Haven Dairy in New Haven and of the Huber Company in Bridgeport were inspected.

Throughout the entire trip the students were very cordially received by the supervisors of the various companies. This was especially so at the Huber plant, where a spread of French ice cream, cake and cigars awaited the men. Mr. Huber, head of the company, has been in the ice cream business for over fifty years, being one of the oldest manufacturers in the industry.

The most modern plant visited was that of the Semons Company. This firm has installed all of the latest machinery and equipment and plans to make their factory the best arranged in the world.

Each student taking the trip was required to fill out a questionnaire containing fifty-four questions dealing with the arrangement and workings of each plant visited. All those taking the trip expressed their appreciation for the fine treatment which they received everywhere during the two days away from the Hill.

PROFESSOR DODGE AT THE GEOGRAPHIC SOCIETY'S CONFERENCE

Mr. R. E. Dodge attended the fifth joint meeting of the American Geographical Society and the Association of American Geographers, held in New York City, April 22 and 23. Mr. Dodge is secretary of the latter organization.

Many problems were discussed, the majority of which had little application to the College. One point that was brought up affecting Economics and Farm Management was the vast opportunities just opening up now in trade both domestic and foreign.
